

Notice of Completion Rowe Channel Upgrade Study Municipal Class Environmental Assessment

The Town of Whitby, in partnership with Central Lake Ontario Conservation Authority (CLOCA) has completed a Municipal Class Environmental Assessment (Class EA) study to assess possible improvement alternatives for upgrading Rowe Channel. The channel is located between the Whitby GO Station and Lake Ontario (refer to map). The existing channel requires improvements to address the failing gabion baskets that line the channel.

The study was carried out in accordance with the planning process for 'Schedule B' projects as outlined in the Municipal Engineers Association "Municipal Class Environmental Assessment" document (October 2000; amended 2007, 2011 and 2015), which is approved under the Ontario *Environmental Assessment Act*. The Class EA process included an evaluation of alternatives, assessment of potential environmental effects, identification of reasonable measures to mitigate any potential adverse impacts, and public and review agency consultation.

The project team has identified and evaluated a range of design options to reduce flooding risk to properties along the channel, minimize the Town's maintenance costs,

improve channel aesthetics, and reduce the presence of invasive species. The preferred solution includes the following:

- Removal of the existing gabion baskets and mattresses along the channel and replacement with an open channel lined with armour stone;
- Replacement of existing culvert crossings at Victoria Street W, Watson Street W and Front Street W with twin concrete box culverts (each 3 metres by 1.5 metres) to fully convey peaks flows; and,
- Construction of riparian buffers along the channel for filtering sediment and pollutants.

In accordance with the Class EA planning process, the Project File Report will be placed on public record for 30-days beginning **August 19, 2022**. A digital copy is available for review on the Town of Whitby website at connectwhitby.ca

Anyone has the right to raise comments or concerns, which should be addressed to rowechannel@resilientconsulting.ca on or before **September 17, 2022**. Alternatively, concerned parties may contact one of the following Project Team representatives:

Priyan Tharumaratinam

Water Resources Technician

During the comment period, if there are outstanding concerns that this project may adversely impact constitutionally protect Aboriginal and treaty rights, which cannot be resolved in discussion with the Town, then a person or party may request that the Minister of the Environment, Conservation and Parks make an order for the Project to comply with Part II of the *Environmental Assessment Act*. Requests on other grounds

will not be considered. This is referred to as a Part II Order request, which addresses Individual Environmental Assessments.

Requests should specify what kind of order is being requested (i.e., a request for additional conditions or a request for an Individual Environmental Assessment), how an order may prevent, mitigate or remedy those potential adverse impacts, and any information in support of the statements in the request. The request should be sent in writing or by email to both the following:

Hon. David Piccini, Minister
Ministry of Environment, Conservation and Parks
777 Bay Street, 5th Floor
Toronto, ON M7A 2J3
minister.mecp@ontario.ca

Director, Environmental Assessment Branch
Ministry of the Environment, Conservation and Parks
135 St. Clair Ave. W, 1st Floor
Toronto, ON M4V 1P5
EABDirector@ontario.ca

Personal information will be collected under the authority of Section 11 of the *Municipal Act*, 2001, and will be used for information purposes only for this study. Questions regarding the collection and use of personal information should be directed to the Town of Whitby Freedom of Information and Protection of Privacy Office at 905.430.4300, extension 2287.

This Notice first issued on August 19, 2022.
