Notice of Community Open House
Michael Boulevard Area Flood Mitigation Strategy
Municipal Class Environmental Assessment

The Town of Whitby (the Town), in partnership with the Central Lake Ontario Conservation Authority (CLOCA), is undertaking a Municipal Class Environmental Assessment (EA) Study to assess the risk of flooding from Lynde Creek. The Study Area is located between Highway 401 and Dundas Street, west of Annes Street and east of Lynde Creek (see map below). The study will evaluate the potential for flooding and flood damages in the area, and will develop and evaluate a range of solutions to reduce or eliminate flooding risks. The study is being conducted in accordance with Schedule ‘B’ of the Municipal Class Environmental Assessment process.

Community Open House:
Input from the public is important to this study. The first of two (2) Community Open Houses (COH) for this Class EA study is scheduled for:

Thursday, May 23, 2019 – 6 p.m. to 8 p.m.

Centennial Building (Regal Room), 416 Centre Street South, Whitby

The purpose of the COH is to provide an overview of the project, present information on the current conditions and risk of flooding in the study area, and solicit feedback on the range of potential solutions to reduce the risk of flooding from Lynde Creek. Representatives from the Town, CLOCA and the consulting team will be available at the COH to provide information,
answer questions, and receive information for consideration throughout the study. The COH will be conducted in an open house (drop-in) format with display material available for review.
